DIAGNOSTIC IMAGING REPORT · RENAL ULTRASOUND

RADIOLOGY & IMAGING REPORT

Patient Name: Sarah Jenkins
Patient ID: PAT-2026-0814
Exam Date: 2026-05-12
Document Date: 2026-05-12
Radiologist: Dr. Karen Wu, MD
Study: Bilateral Renal Ultrasound Examination

CLINICAL INDICATION

Diabetic nephropathy surveillance in patient with Type 2 Diabetes Mellitus and microalbuminuria.

FINDINGS

Right Kidney: Measures 10.4 cm in length. Mild bilateral cortical thinning noted.
Left Kidney: Measures 10.6 cm in length. Normal echogenicity.
No evidence of hydronephrosis, calculus, or perinephric fluid collection.
Renal Doppler demonstrates patent bilateral renal vasculature with normal waveforms.

IMPRESSION

1. Mild bilateral cortical thinning compatible with medical renal disease in patient with diabetic nephropathy.
2. No hydronephrosis or acute obstructive uropathy.
